Jean Feng

Position

July 2020– **Assistant Professor In-Residence**, Department of Epidemiology and Biostatistics, Present *University of California, San Francisco*

Education

- Sept 2015- PhD, Biostatistics, University of Washington, Seattle, WA.
- June 2020 Advisors: Noah Simon, Frederick Albert Matsen IV
- 2012–2013 MS, Computer Science, Stanford University, Stanford, CA.
- 2009–2013 BS, Computer Science, Stanford University, Stanford, CA.

Presentations

Contributed Oral Presentations

2019 Uncertainty-Aware Black-Box Predictors with Coverage Guarantees, Joint Statistical Meetings

Invited Oral Presentations and Seminars

- 2020 Efficient nonparametric statistical inference on population feature importance using Shapley values, International Conference on Machine Learning
- 2020 Training Procedures and Regulatory Policies for Safe Machine Learning Models in Healthcare, University of California, San Francisco
- 2020 Training Procedures and Regulatory Policies for Safe Machine Learning Models in Healthcare, The University of Texas, MD Anderson Cancer Center
- 2020 Training Procedures and Regulatory Policies for Safe Machine Learning Models in Healthcare, University of California, Irvine
- 2020 Approval policies for modifications to Machine Learning-Based Software as a Medical Device: A study of Bio-creep, International Conference on Health Policy Statistics
- 2019 Sparse-Input Neural Networks for High-dimensional Nonparametric Regression and Classification, Western North American Region (WNAR) Annual Meeting
- 2018 Nonparametric variable importance using an augmented neural network with multitask learning, International Conference on Machine Learning
- 2018 Sparse-Input Neural Networks for High-dimensional Nonparametric Regression and Classification, University of Washington Biostatistics Colloquium
- 2018 Sparse-Input Neural Networks for High-dimensional Nonparametric Regression and Classification, Joint Statistical Meetings

- 2017 Sparse-Input Neural Networks for High-dimensional Nonparametric Regression, ICML Workshop on Principled Approaches to Deep Learning
- 2011 Haptic Belt with Pedestrian Detection, Neural Information Processing Systems

Awards

- 2020 University of Washington Thomas R. Fleming Excellence in Biostatistics Award
- 2020 International Conference on Health Policy Statistics, Student Travel Award For manuscript: Approval policies for modifications to Machine Learning-Based Software as a Medical Device
- 2018 Joint Statistical Meetings Section on Statistical Learning and Data Science, Student Paper Award For manuscript: Sparse-input neural networks for high-dimensional nonparametric regression and classification
- 2018 University of Washington Biostatistics Donovan J. Thompson Award for Best Combined Performance on Ph.D. Theory and Applied Qualifying Examinations
- 2015–2017 Big Data for Genomics and Neuroscience Training Grant

Publications

Brian D Williamson and <u>Jean Feng</u>. Efficient nonparametric statistical inference on population feature importance using shapley values. *International Conference on Machine Learning*, 2020.

<u>Jean Feng</u> and Noah Simon. An analysis of the cost of hyper-parameter selection via split-sample validation, with applications to penalized regression. *Statistica Sinica*, 2020.

Jean Feng, Scott Emerson, and Noah Simon. Approval policies for modifications to machine Learning-Based software as a medical device: A study of bio-creep. *Biometrics*, 2020, In press.

Jean Feng, William S DeWitt, Aaron McKenna, Noah Simon, Amy Willis, and Frederick A Matsen. Estimation of cell lineage trees by maximum-likelihood phylogenetics. *Annals of Applied Statistics*, 2020, In press.

Jean Feng, David A Shaw, Vladimir N Minin, Noah Simon, and Frederick A Matsen, IV. Survival analysis of DNA mutation motifs with penalized proportional hazards. *Ann. Appl. Stat.*, 2019.

Kristian Davidsen, Branden J Olson, William S DeWitt, 3rd, <u>Jean Feng</u>, Elias Harkins, Philip Bradley, and Frederick A Matsen, 4th. Deep generative models for T cell receptor protein sequences. *Elife*, 2019.

<u>Jean Feng</u>, Brian Williamson, Noah Simon, and Marco Carone. Nonparametric variable importance using an augmented neural network with multi-task learning. *International Conference on Machine Learning*, 2018.

<u>Jean Feng</u> and Noah Simon. Gradient-based regularization parameter selection for problems with nonsmooth penalty functions. *J. Comput. Graph. Stat.*, 2018.

Pre-prints

Jean Feng and Noah Simon. Ensembled sparse-input hierarchical networks for high-dimensional datasets. *arXiv*, 2020.

<u>Jean Feng</u>, Arjun Sondhi, Jessica Perry, and Noah Simon. Selective prediction-set models with coverage guarantees. *arXiv*, 2019.

<u>Jean Feng</u> and Noah Simon. Sparse-Input neural networks for high-dimensional nonparametric regression and classification. *arXiv*, 2019.

Software

- EASIER-Net Python and R packages for fitting neural networks for high-dimensional data https://github.com/jjfeng/easier_net https://github.com/jjfeng/easier_net_R
 - GapML Python package for analyzing cell-lineage tracing data from GESTALT https://github.com/matsengrp/gestaltamania
 - SPINN Python package for estimating sparse-input neural networks http://github.com/jjfeng/spinn
 - samm Python package for estimating somatic hypermutation rates of nucleotide motifs http://github.com/matsengrp/samm

Work Experience

- 2019 **Research Intern**, *Insitro*, South San Francisco, CA. Developed statistical models of genomic data.
- 2012–2015 **Software engineer**, *Coursera*, Mountain View, CA.

 Built the professional certificate program and payment system. Technical lead on projects with 3-5 people. Mentored interns and junior engineers.

Teaching

- 2020 Instructor, Machine Learning Boot Camp: Analyzing Biomedical and Health Data, Columbia University
- 2018 Teaching Assistant, Biostat 524: Design of Medical Studies, University of Washington
- 2017 Guest lecture, Biostat 561: Computational Skills for Biostatistics I, University of Washington
- 2016–2017 Teaching Assistant, Unsupervised Methods for Statistical Machine Learning, University of Washington Summer Institute in Statistics for Big Data
 - 2016 Teaching Assistant, Supervised Methods for Statistical Machine Learning, University of Washington Summer Institute in Statistics for Big Data
 - 2011 Section Leader, CS106A: Programming Methodology, Stanford University

Service

Referee Service

o International Conference on Machine Learning

- o International Conference on Learning Representations
- o Journal of Computational and Graphical Statistics
- Annals of Statistics
- Statistics in Medicine
- Neural Networks

Session Chair

- o Joint Statistical Meetings
- o Western North American Region (WNAR) Annual Meeting

University Service

- o Student, Faculty, Staff Committee, 2016–2019
- o Department Slack manager 2016–2020
- o Graduate Program Advising Advisory Group 2020
